Getting Started With Your Digital Driver’s License (DDL) (Android)

Download the secure Digital Driver’s License (DigiDL) application on your mobile device

1. Tap Play Store
2. Tap the search bar
3. Type “DigiDL Gemalto” and tap Search
4. Locate the DigiDL app in the list, tap the overflow icon (three dots) and tap Install
5. After a few moments the app is installed
6. The icon appears on your home screen

You are now ready to activate your account!
1. Launch the DigiDL application and tap Register.

2. Review the End User License Agreement and tap Accept.

3a. Reference your Activation Letter from the DMV and register through Option A or B:

   **Option A:** Enter your phone number and Activation Code from the letter and tap Submit Activation Code.

   **Option B:** Tap Scan Activation Code. Tap OK to allow DigiDL to access your camera. Align the QR code in the scanning box until it is read.

3b. **Option B:** Tap Scan Activation Code.

4. After submitting your Activation Code you will receive a text message. Tap the Confirmation link.

Note: You will need to provide the phone number of the device you want to receive text messages on.
Depending on your jurisdiction, you will see one of the following credential types:

You are now ready to start using your Digital Driver’s License!
