Getting Started With Your Digital Driver’s License (DDL) (iOS)

Download the secure Digital Driver’s License (DigiDL) application on your mobile device

1. Tap App Store
2. Tap Search
3. Tap the search bar
4. Type “DigiDL Gemalto” and tap Search
5. Locate the DigiDL app in the list and tap Install
6. The app is installed and the icon appears on your home screen

You are now ready to activate your account!
Activate Your Account and Access Your DDL (iOS)

1. Launch the DigiDL application and tap Register

2. Review the End User License Agreement and tap Accept

3a. Reference your Activation Letter from the DMV and register through Option A or B
   Option A: Enter your phone number and Activation Code from the letter and tap Submit Activation Code

3b. Option B: Tap Scan Activation Code
   Tap OK to allow DigiDL to access your camera. Align the QR code in the scanning box until it is read.

4. After submitting your Activation Code, you will receive a text message
   Tap the Confirmation link

Note: You will need to provide the phone number of the device you want to receive text messages on.
5. DigiDL is launched
   Create a 6-digit PIN code.
   The PIN should be easy to remember,
   and only known by you.
   Reenter the PIN and tap OK.

6. You will see the message
   “Downloading Documents”

7. Your DDL credential is
   securely downloaded
   to your device

Depending on your jurisdiction, you will see one of the following credential types:

You are now ready to start using your Digital Driver’s License!
