Gemalto and iPass Connect Mobile Operators to Over 260,000 Wi-Fi Hotspots Globally

New revenue opportunities for mobile operators with expansion of Mobile Roaming Services for smartphones and tablets

Mobile World Congress, Barcelona, February 15, 2011 — Gemalto (Euronext NL0000400653 GTO), the world leader in digital security, today announced that it has entered into a Technology Collaboration Agreement with iPass Inc. (NASDAQ: IPAS), a leading provider of enterprise mobility services. The collaboration expands the benefits of the Gemalto Roaming Director, and empowers mobile operators with a customized global Wi-Fi roaming solution. Gemalto will present this new service offering at Mobile World Congress 2011 (Gemalto booth Hall 8, Stand 8A102.)

Gemalto’s Roaming Director is a service solution that enables mobile operators to dynamically connect subscribers to their preferred 2G and 3G roaming partners. By adding the global Wi-Fi roaming capability to Roaming Director, mobile operators will go to market more quickly with a comprehensive mobility offering that provides their roaming subscribers with greater choices of network connectivity.

The Gemalto-iPass collaboration enables mobile subscribers traveling abroad to seamlessly access Wi-Fi from their handset in one click, without the need to enter additional credentials or buy a voucher. By utilizing the iPass Open Mobile client for smartphones, subscribers can access over 260,000 hotspots. The new service is charged to the user on their mobile phone bill.

"With the increasing use of mobile Internet devices and Wi-Fi being so pervasive, consumers are demanding more mobile connectivity," commented Jean-François Schreiber, senior vice president Gemalto. “The combined roaming offering from Gemalto and iPass provides mobile users with simple and convenient Wi-Fi access when traveling abroad. It also enables mobile operators to better target different customer segments.”

"iPass has built the world’s largest commercial Wi-Fi network,” added Rod Brewster, vice president of business development and alliances at iPass. “Our collaboration with Gemalto will provide mobile operators with a cost effective implementation of a proven and secure alternative for network connectivity. Additionally, mobile roaming subscribers will have the flexibility to access high bandwidth applications at faster speeds and at lower costs.”

About Gemalto

Gemalto (Euronext NL 0000400653 GTO) is the world leader in digital security with 2009 annual revenues of €1.65 billion, and over 10,000 employees operating out of 75 offices, with research and service centers in 41 countries. Gemalto is at the heart of our evolving digital society. The freedom to communicate, travel, shop, bank, entertain, and work—anytime, anywhere—has become an integral part of what people want and expect, in ways that are convenient, enjoyable and secure.

Gemalto delivers on the growing demands of billions of people worldwide for mobile connectivity, identity and data protection, credit card safety, health and transportation services, e-government and national security. We do this by supplying to governments, wireless operators, banks and enterprises a wide range of secure personal devices, such as subscriber identification modules (SIM), Universal Integrated Circuit Card (UICC) in mobile phones, smart banking cards, smart card access badges, electronic passports, and USB tokens for online identity protection. Moreover Gemalto delivers on emerging applications related to the ‘Internet of things’ by supplying wireless modules and machine identification modules (MIM) for machine-to-machine communication. To complete these solutions we also provide software, systems and services to help our customers achieve their goals.

As the use of Gemalto’s software and secure devices increases with the number of people interacting in the digital and wireless world, the company is poised to thrive over the coming years.
