- ★ Creating services
- ★ Local pages
- ★ Pages with choice
- ★ Distant pages
- ★ Dynamic services
- ★ Service administration
- ★ Managing services

Who should attend:

- ★ Telecom Operators
- ★ Wireless Application Developers

One of the best ways to retain customers is in differentiating the service offering from that of the competition. Whilst providing mobile data services to their customers, operators are also willing to enhance their 3G offers. The implementation of m-services based on Java dynamic SIM Toolkit is the first and fastest step in that moving from a simple transport network business, to a transport and value added services business

Each training session consists of:

- ★ A complete course manual
- ★ Practical exercises

Pre-requisites:

- ★ This course requires participants to have a basic knowledge of the following technologies:
 - SIM card structure
 - ETSI and GSM standards
 - Practical knowledge of any computer language
- ★ This course is held in English
