

Personal Life Mobilizer Administration

Administrate and maintain a fully functional platform

Personal Life Mobilizer solution is bringing today a lot of **benefits for Telecom Operators and end users** by providing a secure place where end users can store their **personal information** such as phonebook, Calendar, tasks, ringtones, pictures and MMS.

Going from the (U)SIM phonebook backup to the Personal Life Mobilizer Solution.

This course delivers the administration principles and gives hands on practical advice.

At the end of the training you will

- > Administrate & maintain a fully functional platform
- > Get platform information through monitoring, logging...
- > Know how to start/stop the platform

Who should attend

- > Telecom Operators
- > System Administrator
- > Customer Service Manager
- > SIM Manager
