

# KEY BENEFITS & DETAILS

## MVDLS - Motor Vehicle and Driver Licensing Solution

Our MVDLS solution is fit for purpose, which means that it is developed specifically for driver and vehicle licensing services, not built on any other architecture/system. This enables full control of future enhancements, and it is not reliant upon modifications to underlying third party architecture or software.

CORE COMPONENTS	FUNCTIONALITY HIGHLIGHTS	BENEFITS
<b>Driver/Client Management</b>	Securely manages client identity and all driving related transactions, providing all relevant information with quick, intuitive user interface	High confidence in client identity, reduced transaction times and improved service levels
<b>Vehicle Management</b>	Fast, comprehensive management of transactions for all vehicle registration activities; integrated VIN validation processes and intuitive business rules to reduce errors	Reduces staff training time and data quality/integrity issues
<b>Vehicle Safety Management</b>	Records the events related to the certified safety status of a vehicle and tracks the safety status locally	Ease of driver compliance inquiries and improvement of road safety
<b>IRP and Fleet Management</b>	Comprehensive IRP and IRP Clearinghouse functionality allowing easy to implement jurisdictional fee changes	Eliminates the need for a separate IRP solution and reduces effort for ongoing jurisdictional fee changes
<b>Reporting and Analytics</b>	Powerful business intelligence engine allowing easy business user reporting queries using familiar keyword/search box style functionality. Operational management dashboard capable with customizable update schedules	Reduces need for IT report development. Business users can query data in real time
<b>Inventory Management</b>	Securely manages the distribution of inventory from warehouse to customer	Generates secure, auditable supply chain for all controlled inventory items
<b>Financial Management</b>	Securely manages all revenue collected through transactions, allowing payment reconciliation and bank deposits	Creates secure, auditable revenue management capability, reducing financial loss
<b>Driver Testing</b>	Records a detailed summary of driver education, assessments or any demonstrated competency that is relevant to a driver meeting the necessary requirements to hold a license	Increases road safety by ensuring competencies have been demonstrated prior to credential issuance
<b>Driver Compliance</b>	Manages the processing and recording of driver non-compliance events. Allows integration with external Justice Information Systems	Reduces training needs and resource effort required to read records and process conviction/sanctions
<b>Driver Safety</b>	Provides driver competence, compliance, and medical fitness records to identify and mitigate high risk drivers and their impact on the general public. Allows integration with external Justice Information Systems	Offers more efficient and convenient ways of interacting, increasing safety and security
