

# Gemalto Cogent ACE-V Manager

## Product Description

Gemalto Cogent's ACE-V Manager application is designed to be used by forensic examiners who perform latent print examinations to automate the ACE-V process. The built-in tools allow trained experts to manage cases, add images, and provide professional court exhibit documentation.

Powered by latest web technology, ACE-V Manager offers a web application that allows easy access to cases or asset info from anywhere within the network. Designed specifically with the ACE-V methodology in mind, ACE-V Manager guides forensic examiners through the analysis, comparison, examination and verification process to ensure a standardized and industry recognized methodology is used in every case.

The built-in transaction management module allows examiners to easily work on and track the progress of multiple cases at once. The extensive documentation, annotation and enhancement tools provide a professional and consistent result.

## Features

- > One system for Primary and Verifier examiners to use
- > Easily access all unmarked images the primary examiner used
- > Easily add multiple verifiers, if necessary
- > Easily track status of the ACE-V process
- > AFIS integration allows examiner to search the AFIS system without having to remark the minutiae
- > Consistent, comprehensive documentation across cases
- > Easily import TP/PP images from AFIS
- > Extensive annotation and enhancement tools available
- > Options for court exhibit layout

# Gemalto Cogent ACE-V Manager
