Fast and intuitive.
The best way to protect and serve.

Gemalto Cogent LiveScan 5.0 Software
Ease of use
Optimized interfaces and usability ensure LiveScan 5.0 is easy to learn and efficient to use.

Fewer Clicks
Modern user interface requires fewer clicks for the same tasks.

Intuitive Capture Process
Guides operators through the biometric capture process.

Designed with Graphical User Interface Experts
Uses the latest user-centered methods to optimize interfaces and usability.

Web-Based Application
Can be accessed via an internet browser.

Training Mode
Easy, offline training helps users learn quickly without the risk of working in a live environment, helping operators get up to speed quickly.

Improved Searching Capabilities
Intuitive dropdown menus and more search fields.

Quality captures
Software automatically verifies capture quality so you and your officers don’t have to think twice about it.

Automatic Quality Checks
Real-time image quality check, auto-center, auto-contrast, and sequence verification.

Guided Capture Process
Visual cues guide users through the process, and an automatic trigger helps ensure excellent images.

Adaptability
The LiveScan 5.0 Software can be tailored to meet your needs.

Multimodal Capture
Demographic and multimodal capture capabilities for fingerprint, palm print, iris, facial, and SMT images.

Plug-and-Play Support for Auxiliary Devices
Biometric devices: fingerprint scanners, palm scanners, facial cameras, iris scanners.
Auxiliary devices: signature pad, flatbed scanner, MRZ reader, 1D/2D barcode reader, magstrip reader, passport reader, driver’s license reader, and FBI-certified printers.

Customizable Workflows and User Privileges
More flexibility and security with customizable workflows and user privileges.

Adjustable Security Setting
Auto log-off can be set to your preference.
