Disclaimer

This communication does not constitute an offer to purchase or exchange or the solicitation of an offer to sell or exchange any securities of Gemalto.

This communication contains certain statements that are neither reported financial results nor other historical information and other statements concerning Gemalto. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, events, products and services and future performance. Forward-looking statements are generally identified by the words “will”, “expects”, “anticipates”, “believes”, “intends”, “estimates”, “target”, and similar expressions. These and other information and statements contained in this communication constitute forward-looking statements for purposes of applicable securities laws. Although management of the Company believes that the expectations reflected in the forward-looking statements are reasonable, investors and security holders are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of the Company, that could cause actual results and developments to differ materially from those expressed in, or implied or projected by the forward-looking information and statements, and the Company cannot guarantee future results, levels of activity, performance or achievements. Factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this communication include, but are not limited to: trends in wireless communication and mobile commerce markets; the Company's ability to develop new technology and the effects of competing technologies developed; effects of the intense competition in the Company's main markets; challenges to or loss of intellectual property rights; ability to establish and maintain strategic relationships in its major businesses; ability to develop and take advantage of new software, platforms and services; profitability of the expansion strategy; effects of acquisitions and investments; ability of the Company's to integrate acquired businesses, activities and companies according to expectations; ability of the Company to achieve the expected synergies from acquisitions; and changes in global, political, economic, business, competitive, market and regulatory forces. Moreover, neither the Company nor any other person assumes responsibility for the accuracy and completeness of such forward-looking statements. The forward-looking statements contained in this communication speak only as of the date of this communication and the Company or its representatives are under no duty, and do not undertake, to update any of the forward-looking statements after this date to conform such statements to actual results, to reflect the occurrence of anticipated results or otherwise except as otherwise required by applicable law or regulations.
Basis of preparation

Ongoing operations and adjusted income statement
For a better understanding of the current and future year-on-year evolution of the business, the Company provides revenue from “ongoing operations” for both the 2014 and 2013 reporting periods except where otherwise noted.

The adjusted income statement for ongoing operations excludes, as per the IFRS income statement, the contribution from discontinued operations, and also the contribution from assets classified as held for sale and from other items not related to ongoing operations.

In this presentation, reported figures for ongoing operations only differ from figures for all operations by the contribution from assets held for sale for the year 2013. There is no difference for the year 2014.

Segment information
From January 1, 2014, segment information is modified to report on progress towards the objectives set as part of the Company’s new development plan covering the years 2014 to 2017, publicly announced on September 5, 2013.

The Mobile segment reports on businesses associated with mobile cellular technologies. The former Mobile Communication and Machine-to-Machine segments are part of Mobile. The security evaluation business for third parties, whose contribution to Mobile Communication was minor, is now managed together with the Patents business and is as of 2014 reported in the Patents & Others segment.

The Payment & Identity segment reports on businesses associated with secure personal interactions. The former Secure Transactions and Security segments are part of Payment & Identity.

In addition to this segment information, the Company also reports as of 2014 revenue of Mobile and Payment & Identity by type of activity: Embedded software & Products (E&P) and Platforms & Services (P&S).

Currency exchange rates
In this presentation, expected revenue variations are at constant exchange rates, and all other figures are at historical exchange rates, except where otherwise noted.
Third quarter 2014 highlights

- Revenue up +6% to €626 million driven by Asia and Americas
- Platforms & Services up +16% with +45% in Mobile Financial Services
- 2014 outlook confirmed

All revenue variations in this document are at constant exchange rates
Jacques TIERNY - CFO

Financial results
Mobile – key financial information

- Embedded software & Products revenue was €264 million, representing a (5%) variation compared to the strong third quarter of 2013.
  - Revenue from embedded secure elements expanded +57% and revenue from Machine-to-Machine connectivity modules increased by +7%.
  - In the high-end 4G and multitenant SIM range, revenue grew by +19%, as projects that were previously delayed entered the deployment phase in Europe and additional deployments began to contribute in Asia, leading multitenant NFC-enabled SIM cards deliveries to increase to 7% of the quarter’s shipments.
- Revenue from Platforms & Services grew by +26%, to €66 million.
  - Mobile Financial Services and Mobile Subscriber Services grew by +45% and +17% respectively.
Payment & Identity – key financial information

- Payment & Identity segment revenue came in at €289 million, increasing by +12% compared to the previous year.
- Embedded software & Products and Platforms & Services revenues grew by +13% and +8% respectively.
- Improvement in the Identity business compared to the first semester, led by higher sales of eGovernment documents, was reduced by lower Government-related Platforms & Services.
- In payment-related activities, North America posted excellent growth, with revenue tripling compared to previous year driven by deployments of EMV payment cards and major contract wins for issuance services in the US.
- In all other regions revenue increased as well, thanks in particular to the continuing roll-outs of NFC dual interface payment cards.

+12%  
(2013 Q3: € 260m)
Outlook for 2014

For 2014, Gemalto anticipates double-digit expansion in profit from operations for the full year as well as an acceleration of year-on-year revenue growth at constant exchange rates for the second semester.

This does not take into account the SafeNet acquisition that is expected to start contributing at some point in the fourth quarter of 2014. As a result of the acquired business’s anticipated profitability, growth and synergies, Gemalto expects its 2017 profit from operations objective of €600 million to increase by around +10%.
Moving forward
The progressive inclusion of our traditional technology into a wider portfolio of devices is a trend we have integrated in our expansion plan till 2017 and beyond.

Our 2014-2017 Multiyear Development Plan presents two opportunities for our Mobile segment, related to embedded Secure Elements and connectivity management.
In payment, expectations for trust and cost efficiency are rising.

*In-store*:
- Magnetic stripe
- Card Not Present payment app and related cloud service
- Chip-based EMV

*Online*:
- PAN manual entry, login/password, sms verification
- SE-Secured in-app and in-browser online payment

Previous generations of payment technologies are progressively replaced to reach new market expectations for security and cost efficiency.
For banks, the Trusted Service Hub delivers secure payment data into a diverse range of devices.
More generally, an acceleration in the spread of secure elements expands our market.

1 application (SIM)
1 type of device (Phone)
1 data mgmt service (OTA)

BEFORE

AFTER

Many applications
Many types of devices
Many data mgmt services

The opportunity described in our development plan is materializing.
Embedded SIMs need both a SIM and subscription management

1 Integration of the SIM
- SIM integrated by OEMs
- Based on an advanced operating system, multitenant
- Contains a bootstrap MNO profile and access keys to enable further provisioning

2 Subscription management service
- Issuance of a new profile and access keys by the selected MNO
- Loading of the secure data into the preinstalled SIMs
- Based on the typical 2-sided TSM architecture (Supervisor=OEM, Service Provider=MNO)

Value for Gemalto

- Gemalto’s added value is unchanged (embedded OS, applications, secure processes, scale)
- Consumer device lifetime similar to postpaid SIM lifetime
- In place for the M2M market since 2011

Well adapted to expand to markets where devices are not distributed by MNOs and end-users don’t pay directly for the subscription

- An additional TSM service is necessary to manage MNO-issued subscriptions throughout the lifetime of a device
- Activation rate in line with current SIM renewal rate (higher for prepaid and lower for postpaid SIM markets)
- It is a many-to-many ecosystem served by Gemalto Trusted Service Hub
Gemalto offers market neutrality, expertise and wide reach

For Service Providers

- One single contract, with Gemalto
- Access to all devices, preserving direct relationship to users
- Preservation of business independence

For Secure Element Issuers

- Access to a wide range of service providers
- Integration with all types of secure elements

Trusted Services Hub

- Available today, to all stakeholders, directly from Gemalto
- The broadest expertise and field experience
